## ABOUT ME

Currently pursuing a master's degree in Software Engineering at FER while acquiring practical knowledge by working student jobs and personal projects. I consider myself as a responsible, ambitious, diligent and creative person who is never afraid to suggest new ideas or ask questions. I'm calm, non-conflicting, reliable and honest person which serves me great in team environment. I'm a fast learner and often find myself making time and effort in order to learn things more quickly. I'm currently looking for part-time position in an environment where I'll be pushed to grow as an engineer and developer.

## SKILLS

- Googling
- Vue.js
- Javascript
- HTML
- CSS

SOFTWARE ENGINEER

## EDUCATION

**Master of Engineering** - Software Engineering and Information Systems  
FER - Faculty of Electrical Engineering and Computing, Zagreb  
2021- Present

**Bachelor of Engineering** - Computer Software Engineer  
FER - Faculty of Electrical Engineering and Computing, Zagreb  
2017- 2021

Final thesis included development of an Office inventory tracking system.

Result: An application that allows each employee to easily track, transfer and write off items for which he/she is in charge by simply scanning QR codes that would be pasted on the item. This enables easier tracking of a firm's physical capital that won't become inaccurate over time. It also enables easier tracking of outdated equipment such as old laptops that need to be upgraded. The application is divided into mobile application used by clients, and web application used by administrators.

Technologies used: Node.js (Express.js), React Native (Expo), Vue.js, PostgreSQL

## WORK EXPERIENCE

**Combis d.o.o.**  
**Junior Software Engineer**  
Mar 2019- Mar 2021

Part of a team of 7, responsible for maintaining and developing internal CRM used by 400 employees as well as dozens of external CRMs for our clients. Main responsibility was resolving business critical bugs and developing custom features in coordination with the PM and other team members.

- Developed advanced timesheet dashboard for tracking time spent for each project by each employee resulting in better, faster and more in-depth knowledge of how much human resource is spent per project. Data collected helped reduce losses caused by underestimating man-hours spent per project while also helping with estimating man-hours for future projects.
- Developed front-end for internal email-like messaging system with all features of modern email client and integrated it with the Dynamics 365 Web API. With all features in one place it reduced the time and effort needed for a particular task.
- Technologies used: Vue.js, Typescript, HTML, CSS, .NET Core, C#, MS Dynamics 365, MS SQL

**InstantSailing d.o.o.**  
**Associate**  
2017- Present

- Active participation in creating a custom CMS for InstantSailing (ASP.net webforms, C#, MS SQL)
- SEO optimization of the website [www.instantsailing.com](http://www.instantsailing.com)
- The person responsible for hiring and leading a team of external authors for the articles on the website.
